Relief / Backpressure Reducing Regulators

## FUNCTIONAL SCHEMATIC

## FLOW CHART

## 077 Backpressure Low Pressure Relief / Backpressure NPT 1/4"

077 Series is a 1/4" NPT type relief/back-pressure regulator suitable for water, chemical, liquid, gas, etc. Regulator's body is made of brass or stainless steel 316L (077S) and 077 Series can be used for very low pressure of 0.3bar (5psig) up to 20 bar (290 psig).

With DRASTAR's patented (patent #10-1086199) "push and lock type handle", you can operate it easily and stably; "locking" by pushing down the handle will prevent any slight change of pre-set pressure value, which could possibly be caused by any vibration from gas pipeline or ambient applications and the other way "unlocking" by pulling it back enables you to adjust the pressure value freely again.

※ **Caution:** Filtering (gas 7 $\mu$ m~15 $\mu$ m, water 15 $\mu$ m~80 $\mu$ m) is a MUST to use in the general gas application other than high purity gases. Otherwise, it may cause a failure to the regulators. It is strongly recommended to install filter for extension of life span and saving the maintenance expense.
